CORE SKILLS

Protocols

OCPP 1.6 / 2.0.1 · OCPI 2.2 · WebSockets · REST / SOAP

Languages

JavaScript · TypeScript · C# · SQL

Backend

Node.js · NestJS · Next.js · .NET / ASP.NET Core

Data & messaging

PostgreSQL · SQL Server · MongoDB · Redis · RabbitMQ

Infrastructure

Docker · Kubernetes · CI/CD · Linux

Mobile & frontend

React Native · Expo · Angular

Payments

KHQR · bank Open APIs · multi-PSP · fee engines

AI & LLMs

OpenAI API · Claude API · RAG pipelines

EDUCATION

M.Sc. Information Technology

Norton University · 2023 –

B.Sc. Computer Science

Norton University · 2014 – 2018

LANGUAGES

Khmer

Native

English

Professional working proficiency

POV Lyhorng

Software Engineer — EV Charging · Utility Billing · Payments

SUMMARY

Backend engineer shipping production systems for the energy and EV mobility sectors since 2019: OCPP/OCPI-compliant charging platforms, utility billing engines, multi-PSP payment integrations, and event-driven microservices on Kubernetes. Cross-platform mobile with React Native. Freelance, project-based engagements with fixed scope and price.

SELECTED ENGAGEMENTS

Nationwide EV Charging Platform

2024

Senior Software Engineer · OONE Power Technology

- Built the OCPP 1.6 / 2.0.1 central system (CSMS) handling concurrent charging sessions over WebSockets, plus OCPI 2.2 hub integration for cross-network roaming.
- Designed event-driven microservices on Kubernetes (RabbitMQ) decoupling telemetry, session lifecycle, and billing.
- Delivered the React Native (Expo) driver app: station discovery, live sessions, payments, history.

Node.js · NestJS · Next.js · PostgreSQL · MongoDB · Redis · RabbitMQ · Kubernetes · React Native

Payment Gateway with Open API & KHQR

2022

Senior Software Engineer · OONE Power Technology

- Engineered a bank-facing Open API (REST and SOAP) and KHQR integration for bill payments across multiple billers.
- Designed the fee engine with configurable rules per biller and channel, with event-driven transaction processing and automated reconciliation.

ASP.NET Core · PostgreSQL · Redis · RabbitMQ · SOAP · Docker

Property Billing System

Oct 2021 – Mar 2022

Freelance · Backend

- Built customer/property management with hierarchical relationships and a configurable charge & pricing engine for varied billing structures.
- Implemented recurring billing cycles with invoice generation, tracking, and revenue/occupancy reporting.

ASP.NET Core · SQL Server · Redis · Docker

Sales & Stock Management System

Dec 2020 – Apr 2021

Freelance · Frontend

- Built the frontend for a full sales and inventory platform: product catalog with variants, order workflows with line-item editing, real-time stock tracking.

Angular · Ant Design · LESS

Billing System for Electricité du Cambodge (EDC)

May 2019 – Dec 2020

Software Developer · OONE Power Technology

- Delivered core billing modules for the national electricity utility: customer management, meter reading, invoice generation, offline payment processing.
- Built the citizen-facing public request portal (connection requests, complaints) integrated with the backend ERP.

ASP.NET Core · SQL Server · Redis · WinForms · Crystal Reports

Early career — Software Supporter

Oct 2017 – May 2019

E-Power CCL Co., Ltd

- Technical support for software installation, configuration, and rollout of new releases for utility-sector customers.
