

POV Lyhorng

Software Engineer – EV Charging • Utility Billing • Payments

Phnom Penh, Cambodia (UTC+7) • +855 85 73 66 67 • lyhorng2.pov@gmail.com • github.com/lyhorng69 • lyhorng69.github.io/profile.me

SUMMARY

Backend engineer with 8+ years shipping production systems for the energy and EV mobility sectors: OCPP/OCPI-compliant charging platforms, utility billing engines, multi-PSP payment integrations (KHQR, bank Open APIs), and event-driven microservices on Kubernetes. Cross-platform mobile with React Native. Freelance, project-based engagements with fixed scope and price.

CORE SKILLS

Languages: JavaScript, TypeScript, C#, SQL	Backend: Node.js, NestJS, Next.js, .NET / ASP.NET Core
Data & messaging: PostgreSQL, SQL Server, MongoDB, Redis, RabbitMQ	Protocols: OCPP 1.6 / 2.0.1, OCPI 2.2, WebSockets, REST / SOAP
Infrastructure: Docker, Kubernetes, CI/CD, Linux	Mobile & frontend: React Native, Expo, Angular
AI & LLMs: OpenAI API, Claude API, RAG pipelines	Payments: KHQR, bank Open APIs, multi-PSP, fee engines

SELECTED ENGAGEMENTS

Nationwide EV Charging Platform

Senior Software Engineer • OONE Power Technology • 2024

- Built the OCPP 1.6 / 2.0.1 central system (CSMS) handling concurrent charging sessions over WebSockets, plus OCPI 2.2 hub integration for cross-network roaming.
- Designed event-driven microservices on Kubernetes (RabbitMQ) decoupling telemetry, session lifecycle, and billing.
- Delivered the React Native (Expo) driver app: station discovery, live sessions, payments, history.

Node.js • NestJS • Next.js • PostgreSQL • MongoDB • Redis • RabbitMQ • Kubernetes • React Native

Payment Gateway with Open API & KHQR

Senior Software Engineer • OONE Power Technology • 2022

- Engineered a bank-facing Open API (REST and SOAP) and KHQR integration for bill payments across multiple billers.
- Designed the fee engine with configurable rules per biller and channel, with event-driven transaction processing and automated reconciliation.

ASP.NET Core • PostgreSQL • Redis • RabbitMQ • SOAP • Docker

Property Billing System

Freelance • Backend • Oct 2021 – Mar 2022

- Built customer/property management with hierarchical relationships and a configurable charge & pricing engine for varied billing structures.
- Implemented recurring billing cycles with invoice generation, tracking, and revenue/occupancy reporting.

ASP.NET Core • SQL Server • Redis • Docker

Sales & Stock Management System

Freelance • Frontend • Dec 2020 – Apr 2021

- Built the frontend for a full sales and inventory platform: product catalog with variants, order workflows with line-item editing, real-time stock tracking.

Angular • Ant Design • LESS

Billing System for Electricité du Cambodge (EDC)

Software Developer • OONE Power Technology • 2020

- Delivered core billing modules for the national electricity utility: customer management, meter reading, invoice generation, offline payment processing.
- Built the citizen-facing public request portal (connection requests, complaints) integrated with the backend ERP.

ASP.NET Core • SQL Server • Redis • WinForms • Crystal Reports
